

Advanced Traffic (20–551) Class Project Part 7

Part 7: Bonus

Goal

1. Explore additional features.

Tasks

- Choose one of the following features to add to your code:
 - Make the intersection dynamically decide when to change the signals.
 - Allow vehicles to change lanes if another lane has fewer vehicles.
 - Introduce AVs into the network and assign them a dedicated lane type.
 - Assign heterogeneous desired speeds to vehicles.
 - Build a SUMO model with detectors.
 - Build a SUMO model with dynamic (actuated) traffic lights.

Output

1. Present the code and run the simulation.
