

Advanced Traffic (xx-xxx) Class Project Part 1

Part 1: Data Handling & Network Basics

Goal:

1. Beginner Python.
2. Object Oriented Programming (OOP) [Work with classes in python].
3. Libraries: pandas, matplotlib, networkx.
4. Read files.
5. Visualize networks.

Tasks

1. Read network file to defined the network.
2. Read network xy positions to draw the network properly.
3. Set some attributes to nodes and edges to use them in the future.

Output

1. One or some python files that can build the network with all the attributes and data in it(including travel time) and draw it properly.
2. Brief report about the code(documentation in all files with a read_me.md file.)
3. Presenting the code for me and answer the questions.
