

Advanced Traffic (xx-xxx)
Class Project Part 3

Part 3: Traffic Light Logic & Intersection Control

Goal:

1. OOP
2. Modifies previous files to integrate traffic light and vehicle movements

Tasks

1. Implement traffic light state changes.
2. Ensure vehicles obey traffic lights at intersections.

Output

1. Modified files of python to integrate traffic light inside.
2. Brief report about the code(documentation in all files with a read_me.md file.)
3. Presenting the code for me and answer the questions.

Time

Week 2-3

Grade Weight

5%(In this part you can not check if your code is good or not. So the most grade of this part will be aggregated with other parts as follows. The current grade is only for the structure you make for your classes and how wide you design them for future.)
