

Advanced Traffic (20–551) Class Project Part 6

Part 6: Analysis & Visualization

Goal:

1. Analyze and visualize the simulation results.
2. Ensure the code is well-documented, readable, and tested.

Tasks

1. Write scripts to plot vehicle trajectories and queue plots.
2. Summarize key statistics (e.g., average travel time, queue length).
3. Provide a complete, well-documented codebase and a **README** file.

Output

1. A ZIP archive containing all Python files that runs on any device.
2. A report summarizing key statistics, trajectories, and queue plots.
3. Present the code and answer questions.
